JOSHUA BASIN WATER DISTRICT MEETING AGENDA REPORT

Meeting of the Board of Directors

July 5, 2017

Report to:

President and Members of the Board

Prepared by: Susan Greer

TOPIC:

APPROVE SALARY SCHEDULE

RECOMMENDATION:

Approve Joshua Basin Water District Salary Schedule dated 5/12/17

ANALYSIS:

CalPERS requires ONE salary schedule per agency, formally adopted by the governing body. Previously, the District had separate salary schedules for the Union group and the Management/Supervisory/Confidential group, and the General Manager wasn't on any salary schedule.

The attached salary schedule was initially developed as part of the Koff Total Compensation Study previously approved by the Board. The schedule was developed so that all employees would be included, and additional in-between steps provide for placement of future positions, as needed.

Adoption of the schedule puts the District in compliance with CalPERS requirements. As future annual cost-of-living increases, that are already negotiated via the 2016-2019 Union MOU, are implemented. the salary schedule will have to come back to the Board for approval.

FISCAL IMPACT:

JOSHUA BASIN WATER DISTRICT MEETING AGENDA REPORT

Meeting of the Board of Directors

July 5, 2017

Report to: President and Members of the Board

Prepared by: Susan Greer

TOPIC:

ADOPTION OF RESOLUTION NO. 17-978, ESTABLISHING THE APPROPRIATION LIMIT FOR FISCAL YEAR 2017/2018

RECOMMENDATION:

Adopt Resolution No. 17-978

ANALYSIS:

The appropriation limit calculation for fiscal year 17/18 is attached. This is another routine matter, requiring annual calculation, posting and approval by the governing body. We posted the calculation as required by law, at least 15 days prior to tonight's consideration for adoption, on June 8. The appropriation limit is also reviewed annually in conjunction with the audit.

The appropriation limit (also known as the Gann Limit) was enacted in 1980. The purpose of the Limit is to place an annual limit or restriction on the growth of tax-funded programs and services. The Limit provides for an annual increase no greater than the increase in the cost of living, plus the increase in population. The proceeds of taxes in excess of appropriations must be designated for purposes exempt from limitation or returned to taxpayers. Proceeds of taxes have been interpreted to include general tax revenues, proceeds from investment of tax revenue, revenue from user fees and charges that exceed the cost of providing the service and state/federal grant revenue unrestricted as to use. Both the cost of living and population decreased compared to last year. The cost of living decreased from 5.37% to 3.69%, while the population for unincorporated portions of San Bernardino County, which applies to us, decreased slightly from .68% to .62%. The combination of these two numbers results in a total increase of 4.33%.

The District anticipates approximately \$428,000 in general tax revenues (the "free" portion of the 1% property tax) plus approximately \$37,000 in interest revenue, this year, which is subject to the Limit. All other revenues, such as for debt service or user fees (because they do not exceed the cost of service) are not subject to the Limit. The total of these subject revenues, \$465,000 is significantly below the 17/18 appropriation limit of \$1,688,477.

N/A

RESOLUTION NO. 17-978

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE JOSHUA BASIN WATER DISTRICT ESTABLISHING THE APPROPRIATION LIMIT OF THE DISTRICT FOR THE FISCAL YEAR 2017/2018

BE IT RESOLVED by the Board of Directors of the Joshua Basin Water District as follows:

- 1. That in accordance with Article XIIB of the California Constitution and Section 7910 of the Government Code of this State, the appropriation limit for this District is established at \$1,688,477.
- 2. The Board of Directors selects the per capita personal income as the cost-of-living factor to compute the appropriation limit.
- 3. That documentation used in the determination of such appropriation limit has been available to the public at least fifteen days prior to this meeting of the Board of Directors.
- 4. This resolution is effective August 5, 2017.

| ADOPTED this 5 th | day of July, 2017. |

JOSHUA BASIN WATER DISTRICT MEETING AGENDA REPORT

Meeting of the Board of Directors

July 5, 2017

Report to:

President and Board Members

Prepared by: Susan Greer

TOPIC:

DISCUSS RATE STUDY SCENARIOS

RECOMMENDATION:

Approve first three scenarios as a starting point for development of 2017 rate study alternatives

ANALYSIS:

The Board authorized the rate study last December. Preliminary information has been provided to the rate consultant already, but we have some remaining big-ticket items that need to be addressed before the financial plan can be developed.

The rate study process first involves developing a long-term financial plan that includes determining our costs based on existing needs and future plans, which then becomes the basis for the rates. We determine how much money we need and then we "back into" the rates, so to speak. We have several new, big issues that we need to consider, and some of them could go one way or another, based on the Board's decisions. That is, the Board could elect to fund all, some, or none of the costs.

<u>Chromium 6</u>. We are waiting for additional Chromium 6 study information. There are still questions about the treatment methodology and even what MCL will be approved by the state. While we wait for information and issues to be resolved, we need to make some assumptions about project costs and grants so that we can give direction to our rate consultant. Later, as more definitive information is obtained, we will adjust. Chromium 6 construction costs have been increased based on the latest information from Dudek. In addition, operations and maintenance costs associated with Chromium 6 will apply to each scenario starting in Year 2, most recently estimated at \$632,000 per year.

CIP Funding. The board approved the Capital Improvement Plan in early 2016, with an average cost of \$2,500,000 per year, but there is no funding to implement the plan, which includes pipeline replacement along with wells, tanks and booster station repair/replacement. The last rate study included very little funding for capital replacement, which was determined at the time to be funded from reserves. Note that the CIP does not include all capital costs, and staff has attempted to insure that we will have reserves in place for those additional projects, which leads to the next topic.

Reserve Funding. Reserves have served the District well by providing a steady stream of available funding for routine repair and replacement of some assets, such as vehicles and computers. However, funding does not exist for meter replacement or studies/reports and funding for building expansion or replacement and equipment/technology are both insufficient. Staff is recommending additional

reserves. Note that the "additional reserves" figures have changed from the initial scenarios previously presented, as we are continuing to analyze and refine. Reserve funding is increased 4% per year

<u>Increased Water Recharge</u>. The District is currently funding recharge of 500 acre feet per year and wants to increase that amount to 1,000 acre feet per year, closer to the actual amount being pumped from the aquifer. This cost increases 7% per year.

The information above outlines several significant factors that will impact water rates:

- Chromium 6 implementation
- Capital Improvement Plan
- Reserve funding
- Water recharge

These are not the only additional costs that will be included with the rate study. Existing and ongoing costs will be automatically increased to reflect inflation. In addition, increased costs that have already been agreed to or contracted for will automatically be included, such as for the recent MOU contract approval. Such previously agreed-to costs are non-negotiable; this discussion relates mostly to issues that are debatable, where the board could determine to fund or not to fund certain costs.

A rate study is a dynamic process. We start with basic information about known sources (revenues) and uses (expenses) of funds. As we pull information together and begin to see results, and what impacts various costs have on the rates, we evaluate and adjust. The attached three scenarios reflect how the Board might determine to allocate costs, which then determines rates. There are dozens of other options for how costs might be allocated, and we will explore some of them as we work through the rate-setting process. We will "cherry pick" from the various options, along with more options that will become apparent as we move through the process.

Recommending these options as the starting point in no way commits the Board to these costs or alternatives; it is just the beginning of a very long process. In the past, we haven't shared this information with the Board or asked for approval at all; we just worked out a reasonable starting point between the GM, myself and the rate consultant. Then, meetings with the CAC, Board and rate consultant drive additional considerations or scenarios and we repeat the process of evaluating and adjusting again-and-again as needed.

At this point, we've simply got to narrow down the options so that we have a starting point. We believe that the Board needs to see what we're calling the "Best Management Practice" option — doing everything that we should do starting in year one — the highest cost. The next option we're proposing is the "Phased Approach," which includes phased-in costs, starting with lower costs and then increasing over the five-year period. The last option is the "Chrome 6 Construction Loan," which includes the assumption that we will not receive full grants for Chromium 6 construction and will incur some loan costs (other two options assume full grant and zero construction cost.)

The various scenario tables include the explanation of the assumptions along the left side of the table. Then, each column shows the costs of each of those assumptions per year. Each scenario includes five years of costs that will be reflected in the five years of rates that will be developed. For example, the Best Management Practice Scenario includes total costs of \$3,626,310 for Year One, up to costs of \$3,783,742 in Year Five. Chrome 6 planning loan costs are \$303,200 in each of the five years and CIP Funding is \$2,500,000 each of the five years, and so forth. In this scenario, there is a total of \$18,515,000 of costs over five years.

As a point of reference, the 16/17 revenue budget is \$5,610,937 although the portion derived from water rates is \$3,502,296.

There are dozens of potential scenarios and we need to find a starting point so that we can begin to develop alternatives for rates. Staff recommends that the Board accept the three scenarios presented as a starting point, which in no way commits us. Note that the last rate study already includes rates that are effective 1/1/18, so there is a 6% overall rate increase already in place. At this point, we cannot complete the new rate study, follow the Prop 218 requirements, and get new rates in place before 1/1/18, but we are shooting for a 3/1/18 date, assuming we have information we need for the Chromium 6 treatment costs to meet that deadline. We will move forward to develop the financial plan with the information we have and plug in the Chromium 6 information when we get it.

This item was discussed by the Finance Committee on 5/22/17 and 6/26/17, and their recommendation is that the board approve these scenarios as a starting point.

JOSHUA BASIN WATER DISTRICT STAFF REPORT

Meeting: Board of Directors July 5, 2017

Report to: President and Members of the Board

Prepared by: Curt Sauer

TOPIC: Well 14 Rehabilitation – Approval to Fund Additional Work

RECOMMENDATION: That the Board authorize the General Manager to take such actions as needed, including the amendment of the Tri County contract, to further treat Well 14, at a cost not to exceed \$150,000 with a 10 percent contingency of \$15,000.

ANALYSIS:

Well 14 has been off line for approximately 16 months, with rehabilitation efforts started in February of 2016.

The General Manager considers this an emergent situation, as the inability to bring this well back on line would create an untenable situation for the District.

Section 4.04.07 of the Administrative Code, Expenditure of Funds for Emergencies, states: It shall be the duty of the General Manager to expend funds necessary to correct an emergency. The General Manager shall notify the President of the Board as soon as possible as to the nature of the emergency and the estimated funds required to remedy the situation,

Presently staff is conducting an additional disinfection of the well casing and gravel pack. Should this process prove unsuccessful, additional work will be needed on well 14.

We have developed a plan for next steps with staff, Tri County and Dudek engineering. The plans cannot be finalized until the lab results are back from current actions. Those results are expected on Thursday July 6.

I estimate the next steps may require funding of up to \$150,000. Depending on test results, we may simply pump this well for an extended period of time, limiting costs to electrical costs and staff time. However, should we have to pull the pump and treat the bottom part of the well, costs could reach \$150,000.

JOSHUA BASIN WATER DISTRICT MEETING AGENDA REPORT

Meeting of the Board of Directors

July 5, 2017

Report to:

President and Members of the Board

Prepared by: Susan Greer

TOPIC:

MID-BUDGET REVIEW

RECOMMENDATION:

APPROVE PROPOSED CHANGES TO 16/17 AND 17/18 BUDGETS AS RECOMMENDED BY THE FINANCE COMMITTEE

ANALYSIS:

The 16/17 fiscal year is now complete and the 17/18 fiscal year has begun. Staff revisited both years of our two-year budget and has made several presentations to both the Finance Committee and the full Board of Directors, starting in April. The last meeting of the Finance Committee on June 26 was attended by four of the Directors; two on the committee and two silent observers. We went over the budget again in great detail at that time. The proposed Operating, Capital, Unfunded, and Chromium 6 budgets are all attached.

The big-picture summary below shows how the proposed budgets vary from the original budgets, indicating that the new budgets result in a deficit of \$939,010 compared to the original budgets. Note that \$413,676 of that deficit relates to the Chromium 6 budget. That budget originally reflected a surplus of \$413,676 over the two-year budget, and timing of grant and loan revenues now more accurately reflects that revenues and costs will closely match, resulting in zero surplus. There is actually no increased costs or revenues, only timing is changed, and because there originally was a surplus and now there is no surplus, that change to the budget is reflected as a "deficit."

| | 2016/201 | 7 Budget | 2017/201 | 8 Budget | COMBINED |
|------------|-------------|-------------|-------------|-------------|-------------|
| | Original | Proposed | Original | Proposed | Proposed |
| | Surplus / | Surplus / | Surplus / | Surplus / | Change from |
| | (Deficit) | (Deficit) | (Deficit) | (Deficit) | Original |
| | | | | | Surplus / |
| | | | | | (Deficit) |
| Operating | 51,055 | 305,646 | 135,847 | (160,296) | (41,552) |
| Capital | (291,174) | (159,023) | (73,480) | (689,415) | (483,784) |
| Chromium 6 | 319,300 | 0 | 94,376 | 0 | (413,676) |
| TOTAL | 79,181 | 146,623 | 156,743 | (849,711) | (939,010) |
| | | | | | |
| Unfunded | (2,961,955) | (2,961,955) | (3,426,855) | (3,426,855) | 0 |

The proposed Operating Budgets are effectively funded over the two years, with a combined \$41,552 deficit compared against the total of the combined budgets equaling \$11,349,080 (.37% unfunded.)

The Chromium 6 Budget is fully funded over the two years.

The Unfunded Budget is substantially comprised of the unfunded Capital Improvement Plan.

The Capital Budget is substantially unfunded and staff recommends that the funding come from reserves. The Board can determine whether or not to fund the Capital Budget and, if unfunded, any emergency projects will be brought to the Board as needed. At a minimum, the Operating and Chromium 6 Budgets should be approved.

Both the original and proposed budgets indicate that the time is right for the rate study. We are substantially funding our operating costs now, but costs are increasing. Also, after operating costs, we have little funding left for our capital projects, which relate right back to operating costs. Failure to upgrade and replace infrastructure increases operating costs, both in the short- and long-term.

FISCAL IMPACT:

Approval of the proposed, amended 16/17 - 17/18 budgets will result in the following impacts:

Operating – increased costs of \$41,552

Capital – increased costs of \$483,784

Chromium 6 – no change (timing only)

*Budget Worksheet: OPERATING

July 5, 2017

Honorable Ryan Zinke Secretary of the Interior U.S. Department of the Interior 1849 C Street Washington, D.C. 20240

Re: California Tribes, Hunters, Businesses, Recreationalists, and National Park Visitors Oppose Cadiz Water Project

Dear Secretary Zinke,

On behalf of the undersigned organizations and our millions of members across the country, we write to express our opposition to the Cadiz Water Project, proposed by Cadiz Inc. in California's Mojave Desert. Our organizations represent diverse constituencies of California desert's national parks and public lands, including campers and hikers, hunters, tribal members, rockhounds, gateway community businesses, and wildlife enthusiasts. We are united in our opposition to the Cadiz Water Project that threatens our way of life and our ability to enjoy our public lands.

The Cadiz Water Project proposes to pump 16 billion gallons of water each year for 50 years from a rural Mojave Desert aquifer for sale to urban, coastal markets. Cadiz Inc. does not have approval from the Metropolitan Water District, which manages the aqueduct required for the project and previously rejected this project due to environmental harm. Additionally, the United States Geological Survey (USGS) and the National Park Service, two of the most respected science-focused agencies in the nation, have found Cadiz Inc.'s aquifer recharge rate to be grossly exaggerated. The USGS concluded that the aquifer's recharge rate is nearly 10 times less than what Cadiz Inc. has estimated, and reaffirmed their analysis on May 5, 2017, writing "We are not aware of new information that would change our recharge estimates." The National Park Service recently stated Cadiz Inc.'s recharge rates "are not reasonable and should not even be considered." The Trump administration should accept the expert findings of its own agencies.

Cadiz Inc. has asked the Trump administration to waive federal review of this project, but doing so would negatively impact the rural communities and stakeholders who use this landscape in many ways. The aquifer supports remote springs Native American tribes from the California desert identify as sacred. These springs are critical for wildlife such as bighorn sheep and support recreational activities including wildlife viewing and hunting. The affected landscape includes both the Mojave Trails National Monument and the Mojave National Preserve, the third largest national park site in the lower 48 states.

Our national parks and public lands should be protected and left in a better condition for future generations. Cadiz Water Project proposes the opposite, and in doing so, undermines the multiple-use offerings of this region developed over decades of careful work by local stakeholders. We urge you to defend the California desert from the harmful Cadiz Water Project.

Sincerely,

Mickey Luckman
President of the Joshua Basin Water District Board of Directors
